MISSION MOMENTS

Amerika Tharu is a 52-year-old carpenter from Nepal. In early 2020, he developed a fever, and his face began swelling. Amerika sought help at two different hospitals, where he was misdiagnosed and underwent expensive treatment that didn't address the problem. His poor health affected every area of his life, including his career. Eventually, his son brought him to see a doctor who suspected that Amerika might have leprosy and sent him to the Presbyterian World Service & Development-supported Shining Hospital. The hospital's medical staff confirmed the diagnosis, and Amerika received the treatment he needed, allowing him to return home and resume his livelihood.
